STATEMENT OF WORK**STATEMENT OF WORK**

This equipment will be placed upon a paved, enclosed area used as an ice skating rink during the winter months. The space available for set up is 190 feet by 80 feet with rounded corners.

The equipment must be mobile. With reasonable effort, moderately skilled maintenance staff members must be able to disconnect, disassemble and move this equipment, using fork lift attachments, from the ice rink in fall, for winter storage. In the spring after melt, the equipment will need to be reassembled and function as designed with the same staff members. The layout of the equipment must be compatible for adjustment and alteration according to safety requirements, customer demand and maintenance requirements for the equipment.

This equipment should be able to support activities for up to 34 youth at a time.

This equipment must be designed to be capable of enduring the extreme degree of wear and tear normal for skateboarding equipment. The youth using the equipment may weigh in excess of 200 pounds.

**SPECIFICATIONS**

**These specifications should be closely adhered to, but variations in overall dimension may be acceptable. Variations should be noted and will be evaluated on a case by case basis.**

**Materials specified should be a minimum for performance, strength and durability; contractor may utilize other materials but should provide comparison of properties, strength and weight to materials indicated in the Statement of Work. Materials should be as good as, or better than, materials indicated in the Statement of Work.**
